Experience Summary

- I have 31 years of experience in Computers, IT, Programming and Design. BUT, my main focus in the last 12 years is on Web Application Development and Engineering. I specialize and concentrate my expertise on Microsoft Technologies. These include, but are not limited to, the .Net Framework, ASP.Net, MVC3 and C# to develop browser based Internet applications. The rest of my past experience is also current, but I enjoy, excel and focus on Software.
- 31 years of experience installing, maintaining and supporting Networks, Servers and Desktop Computers.
- Excellent communication, problem solving and inter-personal skills.
